

Villyge provides the playbook for helping managers to respond to employees' "Life Events" with care, pushing productivity forward and improving the employee experience.

After all, **49%** of all employees have left jobs because their boss was NOT sympathetic to their struggles in their personal life.

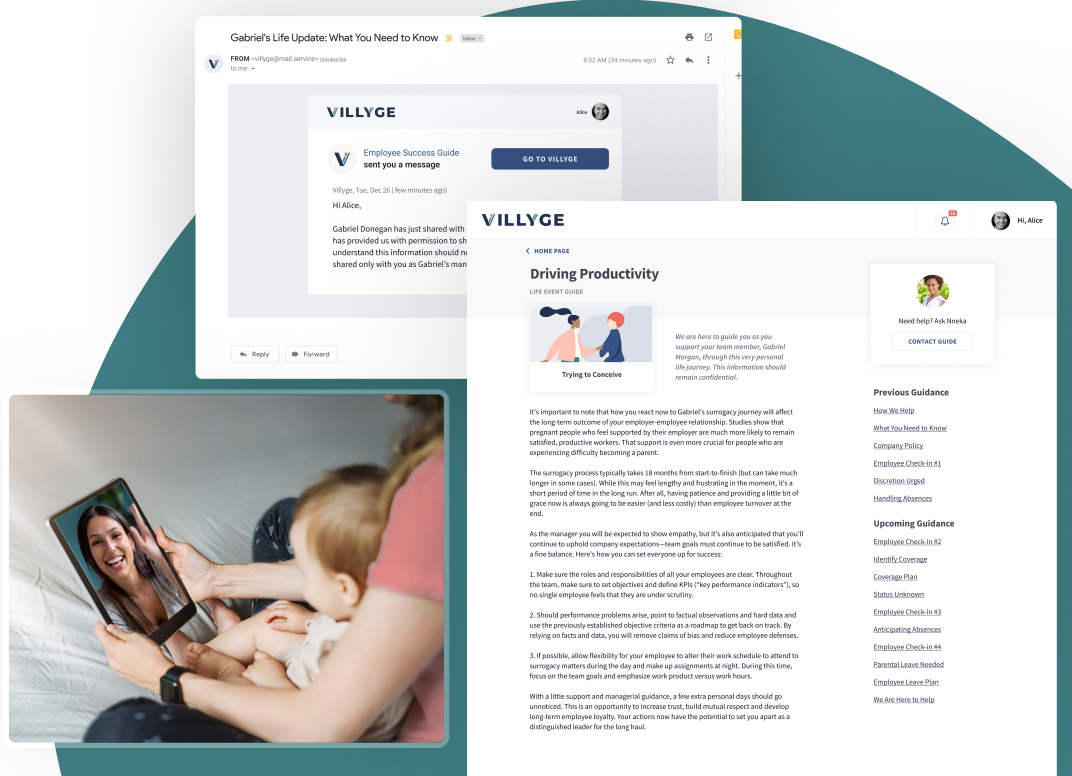

Employees are NOT quitting companies, they're quitting managers.

Villyge alerts leadership of employees' struggles and provides managers with the tools needed to prepare, react and respond appropriately to their "Life Events"

...those things such as nuptials, pregnancy, leave, miscarriage, divorce, loss, moving, menopause, empty nesting, gender affirmation, burnout, etc.

Villyge helps managers to lead with empathy and provides employees with the personalized support they need to achieve their goals, personally and professionally.

Villyge is the only performance management platform to provide managers with the specific playbook they need to support difficult issues in real time, with care.
